Memory Usage (%)

JFS File space Used %

Disk Busy (%)

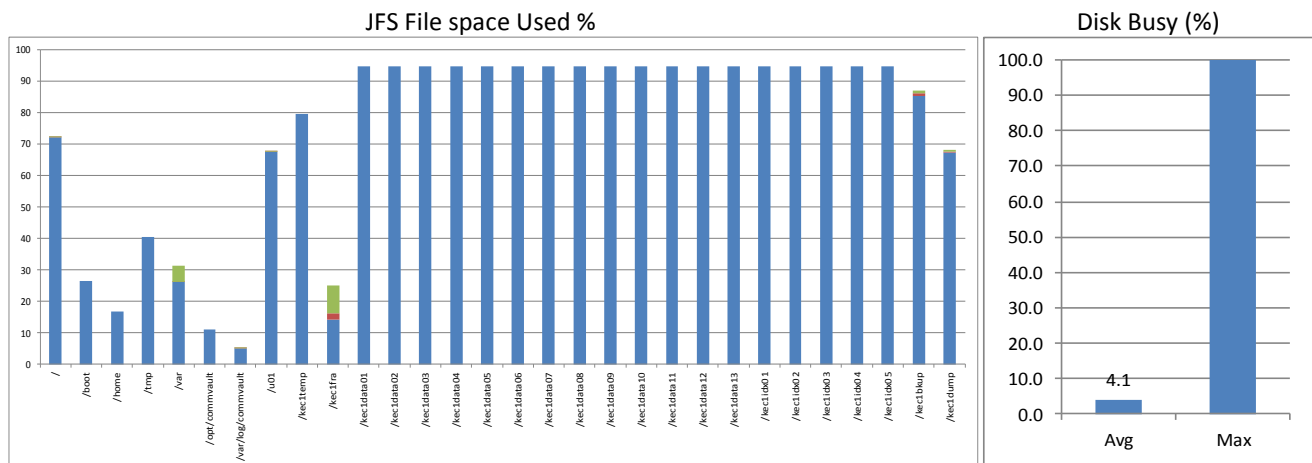

Disk Busy% Reports the portion of time the device was busy servicing a transfer request

CPU Utilisation% Reports the percentage of time the processor or processors spent in execution at the System/User level

Memory Usage: Memory that has been really used, NOT including the memory used by buffers and cache, which can be "dumped" right away if any process needs more memory.

Operating System: 2.6.39-400.215.13.el6uek.x86_64 Oracle Linux Server release 6.5
Uptime: 00:00:02 up 5 days, 9:23, 0 users, load average: 1.34, 1.45, 1.69

Disk Busy% Reports the portion of time the device was busy servicing a transfer request.

CPU Utilisation% Reports the percentage of time the processor or processors spent in execution at the System/User level

Memory Usage: Memory that has been really used, NOT including the memory used by buffers and cache, which can be "dumped" right away if any process needs more memory.
