# Server: cm07

Operating System: AIX 6.1.8.15; **IBM Mode**: 8205-E6D; **Serial Number**: 06744CT
Uptime: 12:00AM up 651 days, 6:58, 0 users, load average: 1.33, 1.88, 2.02
### (Entitled Capacity 0.9; VP 1) - 16 core Shared Pool Utilisation %
Physical CPU Utilisation

Avg 0.2   Max 0.4

24 GB Memory Used (system + process) %
Memory Usage (%)

Avg 39.0   Max 39.3

JFS File space Used %

### Disk Busy (%)

Avg 0.2   Max 34.7

Disk Busy% Reports the portion of time the device was busy servicing a transfer request

CPU Utilisation% Reports the percentage of time the processor or processors spent in execution at the System/User level
Memory Usage: Memory that has been really used, NOT including the memory used by buffers and cache, which can be "dumped" right away if any process needs more memory.

Server: admsrv1

Operating System: AIX 6.1.8.15; **IBM Mode**: 8205-E6D; **Serial Number**: 106F62T
**Uptime:** 12:00AM up 1140 days, 11:29, 0 users, load average: 7.01, 6.59, 6.94

### (Entitled Capacity 0.9; VP 2) - 16 core Shared Pool Utilisation %
Physical CPU Utilisation

	Avg	Max
Physical CPU Utilisation	1.7	1.9

16 GB Memory Used (system + process) %

Memory Usage (%)

	Avg	Max
Memory Usage (%)	72.9	73.9

JFS File space Used %

Disk Busy (%)

	Avg	Max
Disk Busy (%)	1.6	95.8

Disk Busy% Reports the portion of time the device was busy servicing a transfer request

CPU Utilisation% Reports the percentage of time the processor or processors spent in execution at the System/User level

Memory Usage: Memory that has been really used, NOT including the memory used by buffers and cache, which can be "dumped" right away if any process needs more memory.
